

PEAK LIST
HUNDRED PEAKS SECTION
ANGELES CHAPTER, SIERRA CLUB

Approved by Management Committee, November 1987. There are 270 peaks on this list.

Changes from the Peak List dated February, 1986

PISGAH PK (25H) Deleted
CHALK PK (16H) Added

Membership

Any member of the Sierra Club may become a member of the Hundred Peaks Section by (1) ascending at least 25 of the peaks listed on the Peak List, (2) applying to the Membership Chair listing peaks and dates of ascent and giving Sierra Club membership number, and (3) subscribing to the Section Newsletter, the 100 peaks LOOKOUT, For \$6.00 per year. Emblem status is attained by ascending 100 listed peaks. Recognition is also given for ascending 200 peaks and for ascending all of the peaks on the list. Lists of peaks climbed and dates for 100, 200 and list completion should be sent to the Treasurer together with money for pins or patches that are desired. Non-members may subscribe to the LOOKOUT by sending \$6.00 to the Membership Chair.

Climbing Guides

The Mountain Records Committee of the Section publishes climbing guides for each peak which contain information on routes and on private property and fire closure restrictions. Members are urged to submit corrections or suggestions to the Mountain Records Committee. Instructions for obtaining the guides and the Peak List are given in the LOOKOUT.

Maps

Quadrangle maps marked * are of the USGS 15 min series; all others are of the 7 1/2 min series. For some areas both series are available and may have identical names. Elevations shown with a + indicate the highest contour line on these peaks which do not have an explicit summit elevation given on the map which shows the peak itself.

Location

Some peaks are not named on the USGS quadrangle maps although most of these can be identified by the explicit summit altitude on the map. To aid in locating these peaks, the location is given on the Peak List by the standard six-digit convention using the UTM grid. The grid is defined by the numbered blue tick marks which are spaced one kilometer apart along the map edge. A location is designated by a six-digit number; the first three digits comprise the easterly coordinate and the second three digits comprise the northerly coordinate, each to the nearest 100 meters. The graphic scale on the map lower boundary can be used for the distances less than one kilometer. For example, Etiwanda Pk (17F) has the UTM location coordinates of 473874. This means Etiwanda is 300 meters east (third digit) of the north-south grid line marked by "47" on the blue tick marks at the top and bottom edge of the map. Etiwanda is 400 meters north (sixth digit) of the east-west grid line marked "87" on the left and right edges of the map.
